POLLUTION AND WATER RESOURCES: SCIENTIFIC AND INSTITUTIONAL ASPECTS (495A) • Founded: 1968

This seminar explores the effects of pollution and environmental regulation on water and related environmental resources. Forty-one volumes of the seminar's Proceedings, collections of its lectures, have been published, alongside more than forty articles in seven languages published abroad and in the United States. The seminar's research institute, the American Academy of Ocean Sciences, was actively engaged in research from 1969 to 1985. Since the seminar's founding, thirty-three graduate students have participated, with their participation credited toward their studies.

CHAIR/S: **Richard Lo Pinto** • RAPPORTEUR/S: **Sarah Akhtar**

2025–2026 MEETINGS

October 9 — *Control of Reverse Osmosis Membrane Bio Fouling by Controlling Membrane Concentration Polarization (CP)*
Harvey Winters, Fairleigh Dickinson University, Emeritus

February 19 — *Interpreting, Misinterpreting, and Misdirecting the Products of Science*
Richard Lo Pinto, Fairleigh Dickinson University

March 26 — *Light Pollution and Wildlife: How Artificial Light at Night Affects Chimney Swifts*
Elise Morton, Fairleigh Dickinson University

2026-2027 CHAIR/S: **Richard Lo Pinto**, lopintor@fdu.edu
